**Wintner,** Aurel. Analytical foundations of celestial mechanics. 448p. 1941. Princeton Univ. Press, Princeton, N. J., $6.

*Astrophysical journal,* Sept. 1941, p.383. 1 p.

"A coherent presentation of this comprehensive subject. An outstanding feature of the general arrangement is the tersely written collection of historical notes and references. They cover some thirty pages . . . The style, though difficult, has the qualities of freshness and candidness. Frequently mathematical proofs are accompanied by comments that interpret the results arrived at or indicate the scope of their usefulness." *Dirk Brouwer.*

**Yarsley,** V. E., & **Couzens,** G. E. Plastics. 160p. 1941. Penguin, New York, 25c.

*Modern plastics,* Oct. 1941, p.92. ⅛ col.

"Handy in its pocket-size form and engaging in its portrayal of plastics in non-technical style, this narrative . . . should be popular with both technical and layman readers . . . The usual details concerning the raw materials and mechanical processes used in the fabrication of plastics into various articles of commerce are presented for the uninitiated . . . An interesting contribution to the present wave of books seeking to interpret the Plastics Age to manufacturers and public." *G. M. K.*

**Zand,** Stephen J. Kapok; a survey of its history, cultivation and uses with special consideration of its application to thermal and acoustical treatments. 119p. 1941. The Author, Forest Hills, N. Y., $1.50.

*American dyestuff reporter,* Oct. 27, 1941, p.602. ½ col.

"Kapok is a valuable fiber and extensively used but the public knows but little about it at least under that name. For many years the purchaser of a mattress was told that it was stuffed with 'silk floss.' In most instances both seller and buyer had in mind some form of silk fiber and farthest from their thoughts was the fact that it was the product of a tall tree, probably grown in the Dutch East Indies . . . We are glad . . . that at last we have a volume denoted [sic] entirely to this fiber, which goes into detail regarding its source, properties and uses . . . There is a five page Bibliography."

**Zweng,** Charles A. Radio and instrument flying. Ed.3, revised and enlarged. 202p. 1941. The Author, Glendale, Calif., $4.

*Aero digest,* Oct. 1941, p.375. ½ col.

"Covers in a simple and understandable way the many problems of instrument and radio flying . . . [Contains] a wealth of diagrams which assist greatly in the problems of self and home instruction in the ramifications of bad weather flying . . . Highly recommended to anyone concerned with the obtaining of an instrument flight rating."

*Journal of the aeronautical sciences, aeronautical review section,* Oct. 1941, p.26. ⅔ col.

"Offers pilots and instructors up-to-the-minute information on this important subject. Subject text covers two-thirds of the book. The remaining third is devoted to quiz-system questions and answers for use in preparing for license examinations."

---

Volume 7 (September-December 1941) ends with this issue. The next volume will coincide with the calendar year.

## AUTHOR INDEX

### Including titles of anonymous works

September, p.1-20; October, p.21-40; November, p.41-60; December, p.61-77
